***They're not just a
bicycle; they're a
piece of art***

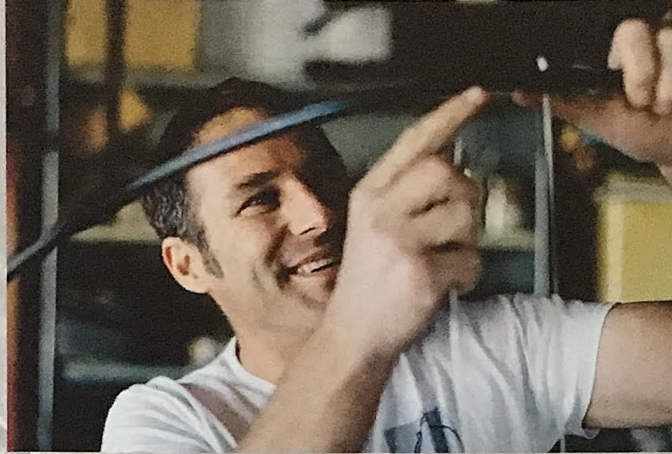

**Handmade Penny
Farthing
Bicycles built
to order**

Why compromise, when you can customise?

Dan has been dedicated to building Penny Farthings for over 15 years. Some bicycles are used for display purposes, although most are well ridden, with some doing over 10,000km a year. Dan's personal highwheel has done over 15,000km.

Each component of every Penny Farthing is individually handmade, so no two bicycles end up the same. Even each wheel hub and spoke is handmade, ensuring the highest quality and exact wheel geometry for strength, safety and durability.

Dan has spent years developing the expertise to advise on and correctly fit a Penny Farthing. The wheel size and geometry, including crank length, are selected for the measurements of the individual rider, taking into consideration the intended use. The bicycle can be built to excel in high speed, long distance, hill climbing, traffic and parades, or a balance of these requirements.

All Penny Farthing Dan highwheels come with;

- Wheel sizing and geometry to fit (virtually unlimited, usually between 44" and 60")
- Original style handformed tapered blade front forks, and internal headstem
- Oval backbone rolled individually to fit each wheel, with tapering to the rear fork
- High quality handmade stainless steel spokes

Additional options and variations include:

- Light weight alloy rim with 3/4" tyre or the smoother vintage looking steel rim with 1" tyre
- Straight or Moustache style handlebars with spade end Buloke grips or straight handles
- Colour availability of each part is endless with high quality powder coated or custom painted finish
- Electroplating in Nickel, Copper or 18 carat Gold
- Acid etched gun blue finish (like metal was in 1880)
- Hand painted Pinstriping or custom motifs
- Premium Handmade Leather saddle, with a Penny Farthing Dan or custom logo of your choice
- Internal wheel sign for advertising including specialised inner wheel attachments

Unlike many things today, it's old fashioned business with 100% value - all you are paying for are materials and the time invested in each masterpiece.

Prices start at \$3100
plus GST and delivery
depending on final
specifications
